

COMP500 / ENSE501: Week 12 – Exercise:

EXERCISE NAME: *Course Result GUI*

The **WinMain** prototype is:

```
int WINAPI WinMain(HINSTANCE hInstance,  
                  HINSTANCE hPrevInstance,  
                  LPSTR lpCmdLine,  
                  int nCmdShow);
```

Write a program that uses the Windows API function **MessageBox** to query and inform the user based upon the following flowchart:
