

COMP500 / ENSE501: Week 12 – Exercise:

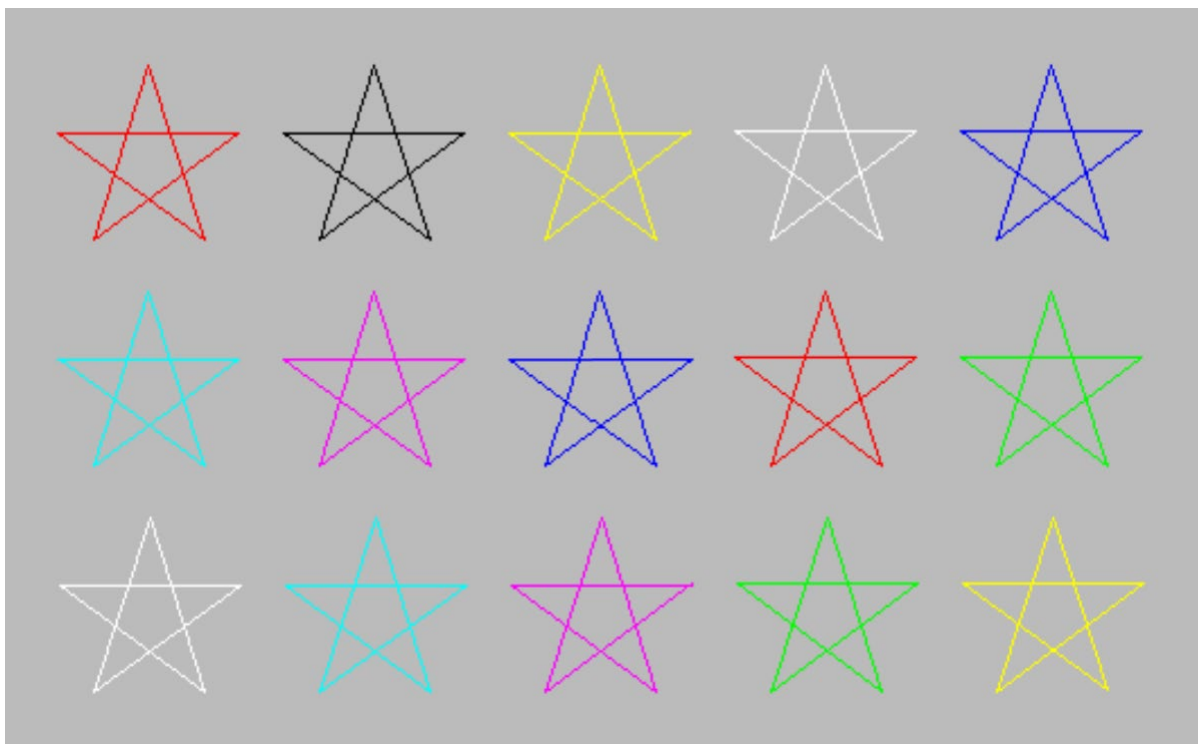

EXERCISE NAME: *GDI Stars*

Using the Windows API and GDI, create a function named `draw_five_point_star_at` with parameters that control its position and colour.

An example of the output when calling `draw_five_point_star_at` is as follows:

Next, call your function multiple times to draw many different colours stars in a 3 by 5 grid pattern as follows:

Ensure your source code compiles and follows good programming standards. Ensure your program is well tested.
