

COMP500 / ENSE501: Week 12 – Exercise:

EXERCISE NAME: *Text Entry Field*

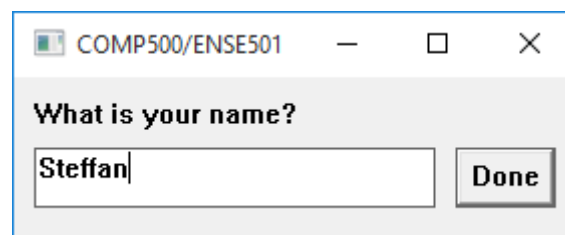

Implement a Window's program that presents the user with three GUI elements:

- Static text that states: "What is your name?"
- A text edit box, with the default text of: "Enter your name here..."
- A button labelled "Done"

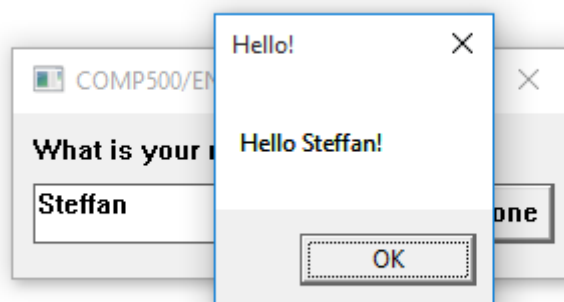

An example of the program when first run is as follows:

The user must be able to type into the text edit box, and once they have completed entering their name click the "Done" button.

When the "Done" button is clicked the program must output a **MessageBox** that states their name in the following style:

Ensure your source code compiles and follows good programming standards. Ensure your program is well tested.
