

## COMP500 / ENSE501: Week 12 – Exercise:

### EXERCISE NAME: *GUI Dice Roller*

Design and implement a program that rolls a six-sided dice for the user using the Windows **MessageBox** functionality.

An example of the program's output is as follows:

When the user clicks “Yes” the program must roll the dice again and present the new random number.

When the user clicks “No” the program must exit.

Ensure your source code compiles and follows good programming standards. Ensure your program is well tested.
