COMP500 / ENSE501: Week 11 – Exercise:

EXERCISE NAME: *Binary Floats*

Write a program that generates an array of 1000 random floating-point numbers between -100 and 100, inclusive.

Write the array out to a binary file named **`randoms_floats.bin`**.

Ensure the program output is exactly as described, and that the whitespace of your source code is well formatted.
